NOOTE

by GamFratesi 2025

NOOTE is a small rechargeable portable lamp designed for the intimate and refined atmosphere of Epicurus Jazz Club in Copenhagen. Inspired by the spirit of jazz, it blends the timeless elegance of 1930s design with a contemporary reinterpretation, creating a perfect balance between nostalgia and modernity.

CONCEPT AND CRAFTSMANSHIP

Compact and versatile, NOOTE is designed to move effortlessly through different spaces, much like the fluid improvisation of jazz itself. It is not just a lamp—it is an atmospheric element, setting the mood with a subtle, rhythmic glow that feels both timeless and new.

LIGHTSCAPE

With its soft, diffused glow and predominantly indirect light, NOOTE enhances intimate settings, offering a warm ambiance that echoes the soulful depth of jazz. Its form, evocative of classic stage lighting, pays homage to the golden age of jazz clubs while maintaining a sleek and modern presence.

LIGHTSCAPE NOOTE

DIRECT LIGHTING

Direct lighting is focused illumination with an exposed light source. It enhances the visibility and directs the light to where it is needed. By highlighting objects and surfaces, direct lighting is useful for specific purposes, like reading a book or prepping food in the kitchen. Choosing the correct light source is vital to avoid glare and lighting that is too harsh.

INDIRECT LIGHTING

Indirect lighting is ideal for creating an ambient setting as illumination relies on reflected, indirect light from the source. The light is emitted in different directions, which adds a delicate brightness, while the concealed light source ensures a glare-free experience. Choosing the correct light source is important to provide a sufficient level of illumination.

DIFFUSED LIGHTING

Diffused lighting is non-directional; a soft, scattered light that is not directed at particular objects or surfaces. The light passes through a translucent surface, creating a softer appearance that serves well as overall room illumination or to create an ambient setting. Choosing the correct light source is essential to avoid unwanted patterns on the illuminated surfaces.

PURPOSE

Lighting a room is all about a comfortable level of illumination, which is the result of a complex interplay between the room, atmosphere, light, and form. Different types of light entail different purposes. Based on our collection, we differentiate between three distinctive purposes: task, ambient and decorative lighting.

DIRECT

INDIRECT

DIFFUSED

TASK

A supportive light to better accomplish a task or specific activity

AMBIENT

An overall light to set or improve the atmosphere of the room

DECORATIVE

A delicate light to draw attention and add distinction to a room
