EK61 OPAL PENDANT

The EK61 Opal Pendant was designed in 1961 by Danish architect and cabinetmaker Esben Klint. The understated and elegant pendant emits soft, indirect light due to its careful combination of classic materials. Originally imagined in pleated plastic, the design was too complicated to produce at the time and remained stored in the family archives. The new iteration features a pleated, superelliptical shape with distinctive top and bottom pieces, evoking traditional Chinese lanterns. The mouth-blown opal glass and oak, meticulously turned and honed by hand, give it a classic look, ennobling the original design
